

Class, Object, Reference

##Types of Methods

1. Constructor
 - Default/Parameterless Ctor
 - Parameterized Ctor
2. Setters
3. Getters
4. Facilitators

this reference

- It is a reference that is passed internally to all the non static methods of the class
- It points at the current calling object

```
double d1,d2;
sysout("Enter first number - ");
if(sc.hasNextDouble()){
    d1 = sc.nextDouble();
    sysout("Enter second number - ")
    if(sc.hasNextDouble()){
        d2 = sc.nextInt();
        double avg = (d1+d2)/2;
        sysout(avg);
    }
}
```
