

Inheritance

```
class Employee{  
  
}  
  
class Manager extends Employee{  
  
}
```

```
Manager m1 = new Manager();
```

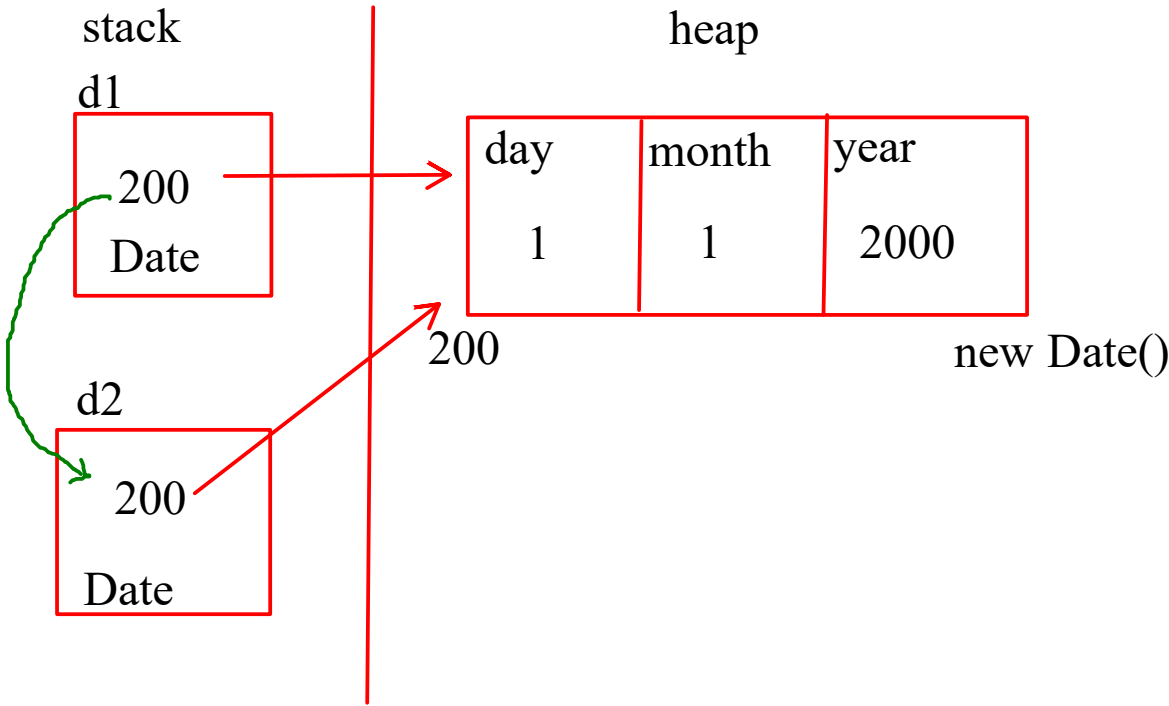

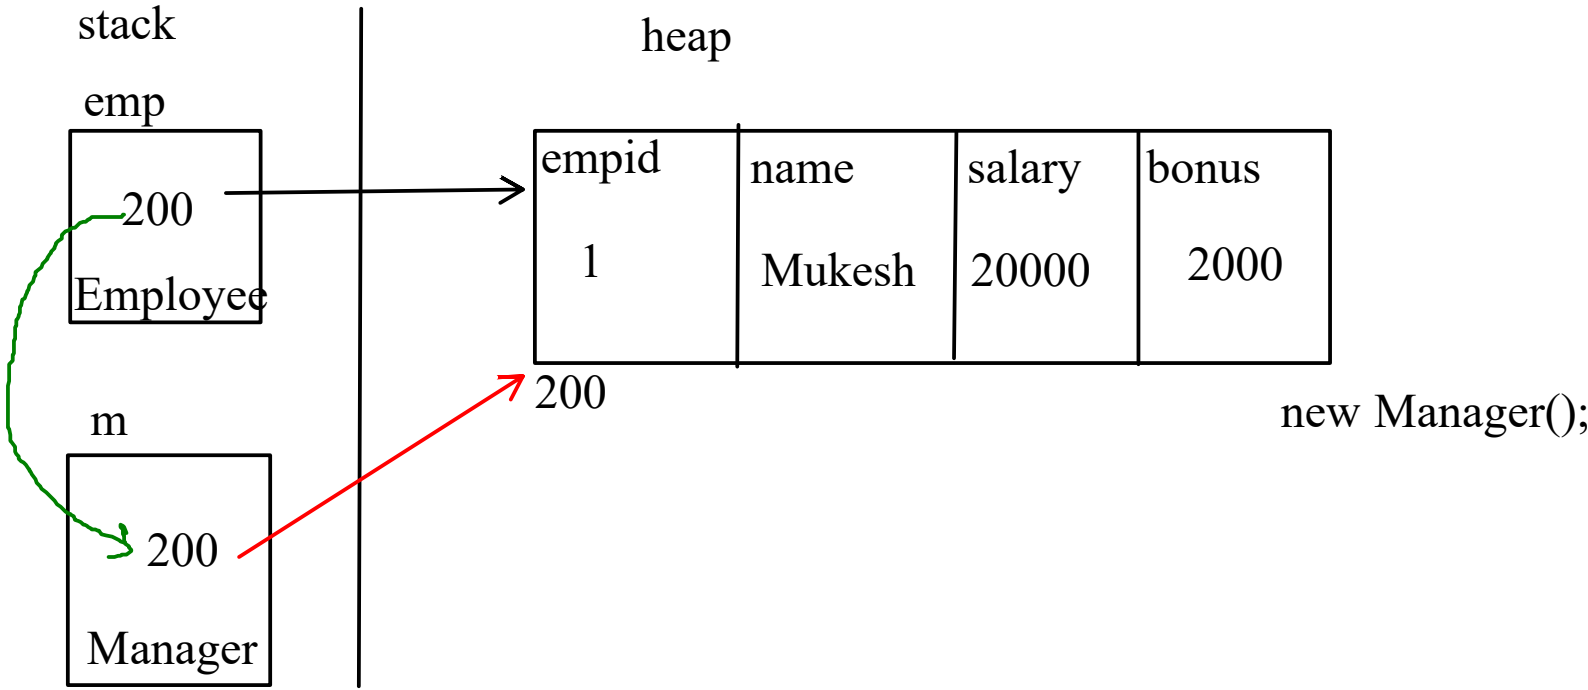

```
Employee e1 = new Manager();  
e1.accept();
```

```
emp = new Manager();  
emp = new Salesman();
```

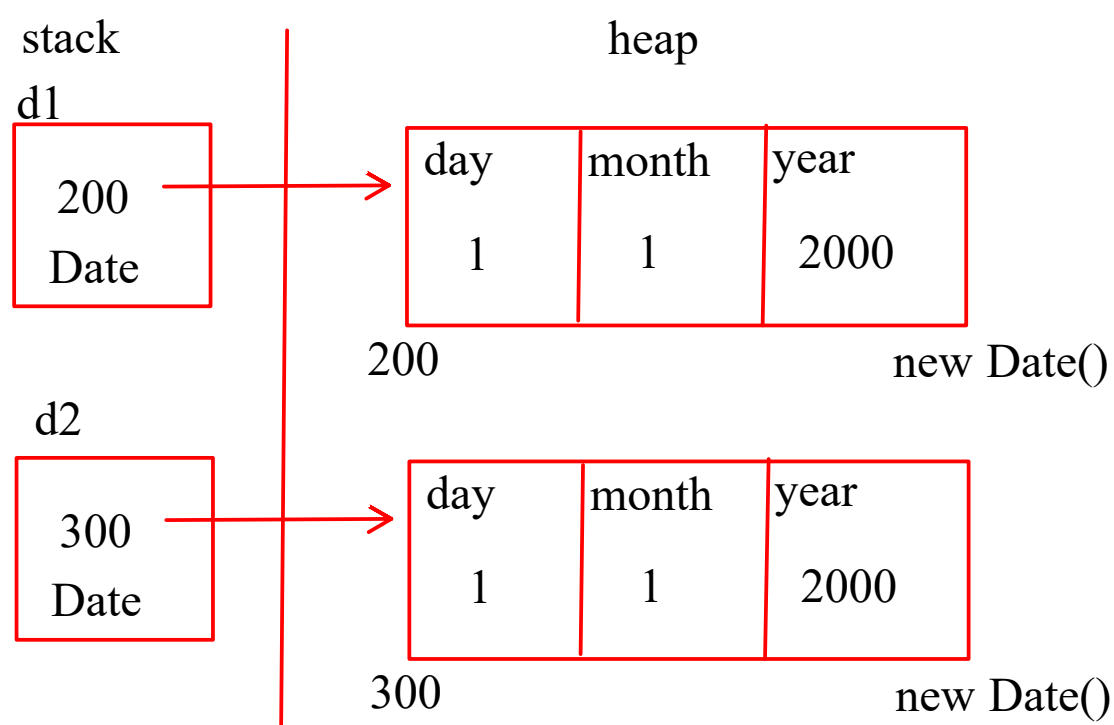

```
emp = new SalesManager();  
m1 = new SalesManager();
```

```
sm = new Manager(); // NOT OK  
sm = new Salesmanager(); // NOT C
```

```
Date d1 = new Date(1, 1, 2000);  
Date d2 = d1;
```

```
d1==d2  
200 == 200
```

```
Date d1 = new Date(1, 1, 2000);
```

```
Date d2 = new Date(1, 1, 2000);
```

```
d1==d2
```

```
200==300
```

```
class Fruit{
    color
    weight
    name
    isFresh
```

```
class Mango extends Fruit{
    Mango(){
        super("Mango");
    }
}
```

```
class Apple extends Fruit{
    Apple(){
        super("Apple");
    }
}
```

```
Fruit(String name){
    this.name = name;
    isFresh = true;
}
}
```

```
new Mango();
```

```
new Apple();
```

Lab Work

- Complete the yesterday menu driven code
- Complete all the To-Do
- Complete the menu driven for the instance of example (calculatetotalsalaty and calculatetotalcommission)
- Complete the last menu driven code for array of employees.
- Solve the Fruit assignment
